

BEST RADIO TUNER OVER E 750

Magnum Dynalab MD-90T

Digital radio has a lot going for it: variety, ease of use... but on pure sound quality grounds, you still can't beat a good FM tuner and a suitable rooftop 'twig'. If you're serious about your radio, the all-analogue tuners

from Canadian FM radio specialist Magnum Dynalab are in a different league. *The MD-90T is the entry-level model and it sounds breathtaking* — only MD's more upmarket tuners deliver more.
